

Global Moderate Income Program

Seeks to provide a stream of current income while maintaining the purchasing power of future income and capital. Targets an asset mix of 50-65% in fixed income securities and 35%-50% in equity type securities.

At Richard C. Young & Co., Ltd., we are committed to meeting our clients' medium long-term investment needs with care and skill. We are not insurers of performance and do not offer insurance for future returns. Our primary focus is to invest in securities that pay interest and dividends.
